## Technical Skills

---

### Languages:

HTML  
CSS  
PHP  
JavaScript  
Java

### Frameworks:

AngularJS  
Bootstrap  
CodeIgniter

### Other:

jQuery  
Node.js  
mongoDB  
Gulp  
Git  
Android  
WordPress  
MySQL

## Soft Skills:

---

- \* I stay positive under stress
- \* I work well as part of a team
- \* I am punctual with deadlines.
- \* I enjoy the problem solving process.

---

## Education

---

### 2012-2015 SCC AS-T Web Development

Dean's list

### 2010-2012 SCC Associate of Arts

President's list, Dean's list

## Experience:

---

### WordPress site for a non-profit organization. - 2015

This project involved working with a team of designers on refreshing the web presence and adding commercial functionality to an existing WP site.

### Gig central - a classified advertisements website devoted to job postings for SCC students and alumni. - 2014

I was part of a team taking on a variety of tasks related to design and development. I helped with building the registration forms using Bootstrap in conjunction with CodeIgniter and connecting them to a MySQL database. I also implemented avatar picture uploads with resize, rename and database storage functionality.

### Restaurant management - 2003-2010

During the time I spent as a manager the Annual Compound Growth Rate of the Revenue was consistently above 21%. The total increase in revenue was  $\approx 400\%$  over seven years. Increased efficiency by improving existing procedures which led to the Profit Margin climbing by over 15%. Improved workflow by implementing an on-call schedule modeled upon emergency healthcare. As a direct result the efficiency of labor utilization increased and the associated costs decreased.
